OBJECTIVE

Third-year B.Sc Computer Science student with hands-on experience in frontend web development and database design. Proficient in React.js, JavaScript, Tailwind CSS, Python, SQL, PostgreSQL, and Supabase, with experience developing responsive web applications and database-driven systems. Seeking a software development or frontend development opportunity to apply problem-solving skills and contribute to building scalable, user-focused applications.

EDUCATION

MIC Arts & Science College, Athanikkal

Malappuram, Kerala

BSc Computer Science Honours - Affiliated to University of Calicut

2024 – 2028

- Current Semester: V
- Relevant coursework: Data Structures & Algorithms, DBMS, Computer Networks, Software Project Management

PROJECTS

Portfolio Website | React, Vite, Tailwind CSS, JavaScript

2026

- Developed a responsive personal portfolio showcasing projects, technical skills, blogs, and contact information. Redesigned my first portfolio, **Notebookfolio**, into a modern professional portfolio with enhanced UI/UX, responsive design, accessibility, and performance.

Thudipp | React, Vite, Tailwind CSS, Supabase, PostgreSQL, Recharts

2026

- Developed a privacy-first college blood donor registry with **Role-Based Access Control (RBAC)** for Public, Volunteer, and Admin users, secure donor management, and coordinator-mediated emergency contact by masking donor phone numbers.

Gym Membership Management System | SQL, DBMS

2025

- Designed and implemented a normalized relational database with 7 tables and an ER diagram to manage members, trainers, payments, attendance, and membership renewals using SQL.

Hospital Management System | C, Data Structures, File I/O

2024

- Built a console-based hospital management system in C featuring administrator and doctor modules, CRUD operations, binary file handling, dynamic memory allocation, and stack-based undo functionality.

GlassyTube | HTML5, CSS3, JavaScript, YouTube Data API v3

2023–2025

- Developed a responsive YouTube-inspired interface using the YouTube Data API v3 and asynchronous JavaScript (async/await) to display live videos, thumbnails, titles, and view counts through a custom glassmorphism-inspired user interface.

TECHNICAL SKILLS

Languages: C, Python, SQL, JavaScript

Frontend Technologies: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Vite

Databases & APIs: PostgreSQL, Supabase, YouTube Data API v3

Concepts: Data Structures, DBMS, Computer Networks, Software Project Management, RBAC

Tools: Git, GitHub, Bun, VS Code, GCC, Linux/Windows CLI

CERTIFICATIONS

- Python & AI Workshop – Upcode Software Labs, MIC Arts & Science College (2025)
- AI & Machine Learning Industrial Training – Sinro Robotics Pvt. Ltd. (2025)
- Machine Learning Workshop – Upcode Software Labs (2026)
- TRIVERGE-26 Certificate of Participation – PPTM Arts & Science College, Malappuram (2026)
- Python Django Full Stack Web Development Internship (2026)

ACTIVITIES

- National Service Scheme (NSS) Volunteer – MIC Arts & Science College
- Participant, Inter-college Web Development Competition
- Participated in an industrial visit focused on advanced networking and server infrastructure technologies
- Interests: Technology Research, UI/UX Design, Frontend Development, Continuous Learning
